

As holder of this card I pledge to follow all OSHA standards for the safe use of the forklift trucks and any other applicable safety guidelines for construction and industry as well as:

1. Read the operator's safety manual for the lift I will be operating.
2. Read and heed all warnings labeled on the forklift truck I will be operating.
3. Check and make sure all labels on the forklift truck are legible.
4. Park the forklift truck in a safe, guarded or protected area, set the brake, shift into neutral, lower the forks to the ground, shut the engine off, remove the ignition key and check chock the wheels.
5. Conduct a thorough walk-around inspection of the forklift truck before starting.
6. Assure tires are in good condition and properly inflated.
7. Verify correct tire ballast (if required).
8. Make sure backup alarm and horn works and you can hear it with the engine running.
9. Conduct a complete operational check of all controls, brakes and steering.
10. Know the capacity and operating characteristics of the material handler.
11. Know the requirement for "Line-of-Site" when operating the forklift truck.
12. Never modify or remove any part of the forklift truck.
13. Always wear a safety belt while operating forklift truck.
14. Carry all loads as low as possible.
15. Lifting personnel with the forklift truck is strictly prohibited.
